The next winter will come ...

Universal snow blade for mounting on wheel loaders, tractors, forklifts and special vehicles. With the **HS snow-king** you can quickly liberate the streets, parking lots or walkways etc. from snow and ice.

- > robust, torsion-resistant steel construction with spring valve segments and polyurethane insert (polyurethanes strip 20 mm thickness, 150 mm high)
- > hydraulische 30° Schwenkeinrichtung
- > elastic edge protection to prevent damage by curbs etc.
- > excellent clearing
- > excellent corrosion protection with surface sealing with KTL-coating and subsequent powder coating in RAL 2000
- > with support leg

Snow-King

Universally usable snow blade from HS-Schoch

Top equipment as standard:

- > mounting device for different carrier vehicles
- > over trapezoidal spindle, adjustable heavy duty castor wheel \varnothing 250 x 80 mm with vulcanized elastic rubber, dust resistant, low-maintenance deep groove ball bearings, reinforced forks and hardened rim bearings

- > hydraulic pressure control valve
- > 30 ° hydraulic swivel mechanism about 2 robust and stable corrosion resistant hydraulic cylinder with hydraulic connector SVK size 3
- > with 4 rollers guided leveling
- > A lighting device according to German law with 7-pin plastic car trailer plug (also with 2-pin automotive connector)
- > flag holder
- > Overall width 2.520 mm
- > Clearing width 30° swiveled 2.180 mm
- > Total height 1.020 mm
- > Weight 585 kg

Special equipment:

- > enlargement bolt-on polyurethane blade for the left and right, each 355 mm wide
